TANKLESS WALL HUNG WC

SENSOR OPERATED

BATHROOM TECHNOLOGY REDEFINED

Tankless By CERA is not just any other product. It's a forerunner to the future of bathroom spaces. Tankless is a wall hung EWC, containing only the toilet bowl, with no cistern. The water comes directly from the supply line, and each flush has enough pressure to clean the bowl in one go. A bathroom without a cistern means more space while the efficient flushing system saves water. The Vibe Sense sensor based flushing technology completes the futuristic feel to your toilet and makes your bathroom experiences sleek, spacious, and simple.

WHY GO TANKLESS?

No tank. More space.

Direct water from the supply line.

No waiting time between flushes.

Touchless, hygienic experience.

Uber-cool designs.
